PROFESSIONAL SUMMARY

High-achieving Computer Science and Engineering undergraduate at United International University (UIU) maintaining a 3.86/4.00 CGPA with strong technical expertise in Computer Networking, Cyber Security, and Software Engineering. Proven track record in configuring enterprise network architectures, developing machine learning-driven security platforms, and building scalable full-stack applications. Seeking an internship opportunity to apply hands-on networking, security, and software development skills in real-world engineering environments.

EDUCATION

B.Sc. in Computer Science & Engineering (Ongoing)
United International University (UIU)
CGPA: 3.80/4.00
Expected Graduation: Spring 2027

TECHNICAL SKILLS

Programming: C, C++, Java, Python, TypeScript, JavaScript
Web & Backend: HTML5, CSS3, Tailwind CSS, PHP, React, Next.js, Node.js, FastAPI
Database: MySQL
Networking: Routing & Switching, OSPF, VLAN, NAT, DHCP, VLSM, Enterprise LAN/WAN Design
Cyber Security: Authentication & Authorization, Security Basics
Tools: Git, Linux, JavaFX, Figma, Cisco Packet Tracer.

PROJECTS

- LagaTour – Social Tour & Travel Platform

  Engineered an interactive travel platform with collaborative itinerary sharing, destination mapping, and AI recommendations using React, Node.js, MySQL, Firebase, Socket.io, and Gemini AI (Top-30 University Project Showcase Finalist).

- UIU Note Share Platform

  Developed an open academic repository with React, TypeScript, and Supabase to facilitate peer learning, lecture note sharing, and exam preparation for UIU students.

- AchieveKIT – Productivity Toolkit (AOOP Course Project)

Designed and developed a modular JavaFX productivity application applying core OOP principles, Scene Builder GUI, and file handling (Top-30 University Project Showcase Finalist).

- Geo Trips – Travel Management System (DBMS Course Project)

  Built a relational database management web application using PHP and MySQL with normalized database schemas, complex SQL queries, and transaction management.

- Authentication & Authorization System (Computer Security Project)

  Engineered a secure web authentication system in PHP/MySQL featuring password hashing, role-based access control, Google reCAPTCHA, and PHPMailer verification.

- Enterprise Network Setup (Computer Networks Lab Project)

  Configured a simulated multi-router enterprise network in Cisco Packet Tracer with 7 routers (ISR4431) and 7 switches using OSPF, VLANs, NAT, DHCP, and VLSM.

ACHIEVEMENTS

- Top-10 / Top-30 University Project Showcase Finalist: Multiple course projects (AchieveKIT, Geo Trips, Nest-Quest, LagaTour) selected for university exhibitions.
- Competitive Programming: Solved 150+ problems on Codeforces (Handle: CyberXENON) demonstrating strong analytical problem-solving skills.

LANGUAGES

- Bangla (Native)
- English (Good proficiency)

INTERESTS

- Computer Networking (VANET, V2V/V2I Communication)
- Cyber Security & Threat Analysis
- Reinforcement Learning & Edge-Cloud Scheduling
- Learning New Technologies & Traveling
